

Call for Book Chapters

Student Innovation and University Outreach for Sustainable Communities

This volume brings together conceptual frameworks, empirical studies, and field-tested case accounts that position students as innovators, change agents, and co-creators of sustainable solutions at local and global scales. While existing literature has largely examined service-learning and sustainability education as distinct areas, relatively few studies provide a consolidated perspective on how university outreach, experiential learning, and SDG-oriented innovation intersect. This edited volume, drawing on invited contributors from diverse regions and institutional contexts, seeks to address this gap.

The volume moves from the conceptual and pedagogical foundations of university community partnerships to campus living laboratories, human empowerment, climate resilience, and the scaling of student-led innovation. By combining theoretical perspectives with global case studies and an inclusive-growth lens for evaluating impact, the book aims to provide a balanced account of both successful and challenging experiences, including issues of power asymmetries, technological solutionism, institutional constraints, and barriers to scaling. It further seeks to develop a global framework for accountable and reciprocal university–community engagement in support of the 2030 Agenda and the Sustainable Development Goals.

Table of Contents

Part I: Foundations

- Preface
- University Outreach and the SDGs: A Global Framework
- Service-Learning as a Catalyst for SDG Awareness
- Evaluating Impact: An Inclusive Growth Framework for University–Community Engagement

Part II: Campus as Living Laboratory

- Open and Green Spaces in Educational Institutions for Emotional and Physical Wellbeing
- Digital Technology and Social Responsibility: Promise, Pitfalls and the Limits of Solutionism

Part III: Empowering People

- University Engagement in Rural Youth Empowerment
- Digital Literacy Missions: Student Mentorship Models for Reducing Inequalities
- Promoting Gender Equality through University Outreach
- University-Enabled Social Entrepreneurship

Part IV: Environmental Sustainability and Resource Management

- Student Co-Creation of Low-Cost WASH Solutions
- Campus-to-Community Renewable Energy Pilots
- Sustainable Agriculture Interventions by Student Innovators
- Youth-Driven Circular Economy Models for Community Waste Reduction
- Community Mapping and Citizen Science for Environmental Monitoring

Part V: Climate Resilience and Community Preparedness

- Student-led climate Action Initiatives
- Building Resilient Communities Through Disaster Preparedness

Part VI: Scaling Innovation and Future Directions

- SDG-Driven Innovation in Computing Education: A Global Analysis
- Conclusion – Toward a Global Framework for Student-Led SDG Innovation

Website link-Call for Chapters

URL: <https://profmittal-tech.github.io/call-for-book-chapters/>

Invited Contributions

We welcome empirical case studies, comparative analyses, conceptual papers, evaluation studies and reflective practitioner accounts. Contributions from faculty, researchers, students, community partners and policy practitioners are encouraged, and chapters that critically examine failure, scaling barriers or unintended consequences are particularly welcome. **Preference will be given to contributions involving international co-authorship and collaboration across institutions and geographical regions.**

The published book will be submitted to SCOPUS for indexing. **No Publication Fee involved.**

Important Dates

Abstract Submission:	October 15, 2026
Full Chapter Submission:	December 01, 2026
Review Results:	January 15, 2027
Final Versions Submission:	February 15, 2027
Final Acceptance Notification:	March 10, 2027

Abstract Submission:

For any queries: springer.bookchapters@gmail.com

Submission Guidelines

- Font and Size: Times New Roman, 12-point font
- Line Spacing: 1.5
- Referencing Style: APA 7th Edition
- Table captions should be placed above the respective tables.
- Figure captions should be placed below the respective figures.
- Abstract: Maximum 250 words
- Word Limit: Maximum 6000 words
- Chapters should be free from grammatical and typographical errors and should be carefully proofread before submission.
- At least 70% of the cited references should be from the most recent five years
- All in-text citations must be accurately cross-checked against the reference list.
